Charcoal **Briquette**

Our briquette are made from coconut shell charcoal, hardwood and sawdust taht are burnt down the same way as lump charcoal. unlike lump charcoal, which is pure wood, additives are in the process of making briquettes.

the additives are mainly used to hold the materials together in order the achieve clean little blocks that are often roundish-squarish in shape which makes them easier to stack. they provide a more stable burn, maintaining a steady temperature for a longer period of time with less hand hilding then lump charcoal.

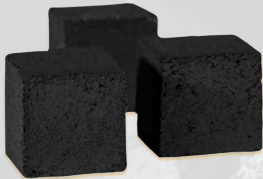

Shisha Charcoal

Ash Content	• Max 2%
Volatil Matter	• Max 12%
Moisture	• Max 5%
Fixed Carbon	• 80%
Gross Calorific Value	• 7500 Kcal / KG

Fixed Carbon	• 65 - 75%
Total Sulfur	• Maximum 0,03%
Gross Calorific Value	• 6500 - 7500 Kcal / KG
Duration of Burning	• 6 Hours

While there may still be some argument about it, most people in the know agree the food grilled over charcoal tastes better than food grilled over gas. yes, gas grilling is quicker and more convenient, but when it's the weekend and you have all the time you need, charcoal is trullt the way to go.

Pillow Shape BBQ

Hexagonal Shape BBQ

Raw material mix from hardwood and coconut shell

Sawdust Charcoal BBQ

Shape	• Hexagonal (5 - 30 CM)
Ash Content	• 4 - 5 %
Volatil Matter	• Maximum 13%
Moisture	• 5-6%
Fixed Carbon	• 80%
Total Sulfur	• Maximum 0,03%
Gross Calorific Value	• 7000 - 7500 Kcal / KG
Duration of Burning	• 6 Hours

Sawdust charcoal briquettes are a type of fuel made from sawdust, often combined with a binder and then compressed into briquette form. They're popular for grilling and barbecuing because they can be more environmentally friendly compared to traditional charcoal.

Raw material from saawdust wood Mahony, Merbau, Sonokeling, Kamper

Natural Hardwood Charcoal

Hardwood charcoal is made by heating hardwoods without oxygen, producing a solid, porous, and clean-burning fuel. It creates less smoke and ash, delivers consistent high heat, and adds a distinct smoky flavor, making it ideal for BBQ, grills, and fireplaces.

Mix Hardwood Charcoal

Tamarind Wood

Shape	• 5 cm up
Ash Content	• 3 %
Volatil Matter	• Max 15%
